

Water colored Newspaper Flowers

1. Take the sheet of newspaper and do watercolor washes on it. See diagram.

I chose red for the petals. Pick the color that you like.

If you didn't want to use watercolors, water-based markers would work.

2. Take the cardstock and do a blue watercolor wash over the entire sheet. Blot the wet paint with a paper towel.
3. Let dry.
4. Cut out stems and leaves from green rectangle.
5. Cut out flower centers from yellow.
6. Cut out butterfly shape from orange.
7. Cut out flower petals from the last color.
8. Glue pieces to cardstock to make the flowers.
9. Use black watercolor to add to details to butterfly and flowers.
10. Can add white crayons for dots onto Monarch Butterfly.
